Quick Facts

- HÖRTIG is one of leading manufacturers of air tube transport systems.
- Mr. Bruno Hörtig founded the company in 1967.
- 1995 Mr. Martin Hörtig took over the company and leads the company in the long tradition of innovative development.
- HÖRTIG is a ISO 9001 certified company.
- Keeping long-term business and distribution relationship with more than 100 foreign partners throughout Europe and Asia.
- Has customers from all over the world in 45 countries, including large-sized triple A hospitals, supermarket chains, as well as multicorporate industrial groups.

History – Timeline

A World-Class Air Tube System

- HÖRTIG ROHRPOST is the leader in air tube transport systems for industry:
...trusted by the world's largest US\$ 20 billion integrated chemical complex, Sadara Chemical with an investment of US\$ 18 million Air Tube system supplied by HÖRTIG ROHRPOST comprising:

- 26 km of Do160 mm stainless steel tube
- 98 stations, 1000 leakproof carriers
- 12 revolver transfer units
- designed for 600 carriers “on-the-way” and up to 480 carriers per hour

...unrivalled Air Tube solution only from HÖRTIG ROHRPOST

- Only original manufacturer of Air tube system from Germany since 1967.
- Continuous development of innovative solutions to deliver superior quality, high performance and technological-advanced systems to our valuable clients.

Why hospital needs an Air Tube Transport System?

- Fast Turn-Around Time (TAT)
 - speed of air tube system is 3 to 6 m/s
 - transport of **samples or pharmaceutical items** is just a few minutes; **average delivery time is 2 to 3 minutes**
 - better utilization of lab equipment with **continuous workflow**
 - **fast and accurate delivery** of test results, reports, etc.
- Improved Patient Service
 - sick patients need not walk to/fro blood collection room
 - **hospital-friendly** for patients
 - faster turnaround of lab-test process **reduces crowding at clinics**
 - **one-stop service** with connections to lab and pharmacy

Why hospital needs an Air Tube Transport System?

- Better Infectious Control
 - **reduces potential spread of virus** with less movement of sick patients / crowding at clinics
 - **safe management** of contaminated specimens or samples
 - prevention of cross-contamination; **safe, clean and hygiene**
- Efficiency
 - **24 hours/7 days operation & spontaneous** transport; only possible with transport systems
 - **quick connectivity** from patient areas to lab, pharmacy, medical record, X-ray; improved patient service
 - better facilities management; **reduces cost of operation**

Why hospital needs an Air Tube Transport System?

- 1 Reduces Manpower cost by 5-10%**
- 2 Help reduce electricity cost since lift usage is limited.**
- 3 Gives advance look to the hospital if transperant tube system is installed.**
- 4 Helps saves patient life in case of emergency since you can get medication in quick time from pharmacy.**
- 5 In Hortig system you can maintain all transaction record with log record which will help in transparency and may be in medico legal cases.**

Benefits of Air Tube Transport System

- Timely Turnaround Time of Diagnostic Lab Test
 - shorter TAT from order of lab test to diagnostic report
- Quality of Service
 - high quality of service; international benchmarking
- Higher Productivity
 - increase volume of lab test; higher revenue for hospital
- Reputation
 - international standard, efficient process, quality service
- Patients satisfaction
 - patient experience; shorter waiting time, less crowding

Typical Material Transports in hospital

Typical Transport Requirements in Hospital			
Item	Material Transport	From	To
A	Blood specimens, blood cultures, swabs, urine samples, stools, etc 	Outpatient clinics, Wards, ICU, OT,...	Laboratory, Pathology
B	Prescription (Rx) Drugs, Medicines 	Pharmacy	Inpatient wards, ICU, Operating theatres, Outpatient area
C	Document A4, test reports, forms, X-ray films (up to 400 mm),... 	Various department Eg: registration area, medical record, personnel, mail room	Various department

Common Transport Items

- Blood
- Plasma
- Tissues
- Prescription
- Patient record
- X-Ray Film
- Document
- Drugs
- Test results

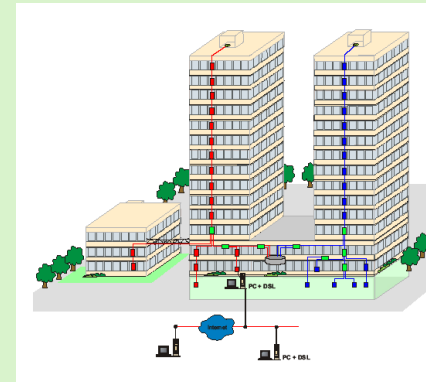

General Transport Volume

Size of hospital (beds)	No. of Stations (typical)	Average no. of carrier sending's per day	Total carrier travel distance per day	Total carrier travel distance per year
250-bed	15 to 20	600+	90 km	30,000 km
500-bed	30 to 40	1500+	225 km	70,000 km
1000-bed	60 to 80	2500+	375 km	115,000 km
1500-bed	100 to 120	3500+	525 km	160,000 km

- Based on average 150 m per sending
- Compare with walking to transport items
- Expensive staff should not loose productive time
- Focus on patient care instead of delivery tasks

Features of Air Tube System

- Speed of Air Tube system is 6 m/s
- Spontaneous Transports, payload up to 4 kg
- Faster availability of test results, 24 hours 7 days
- Reliable delivery and time saving
- Reduction of work load, concentration on patient care
- Future stations can be added onto the line, if required

Superior Features of Hörtig Air Tube

- Manufacturer:
 - a dedicated and innovative manufacturer of Air Tube systems since 1967
- Simplicity:
 - user-friendly and easy-to-use
 - ColourSend for automatic dispatching to Lab and Pharmacy
 - optimum travel route, high efficiency
- Reliability:
 - industrial field bus: CAN-bus via Ethernet, IP-based Networking
 - 3-D display, teamviewer for remote support
 - no overloading, no obstacle, RFID reader, secure
- Innovation:
 - arrival screen, dispatch screen, networking with LIS, PIS, BMS, etc
 - revolver transfer: efficient, buffering, priority, multi-design
 - dual-blowers, dual speeds, energy saving
 - customised solutions

Hörtig Rohrpost - your trusted Air Tube partner

- a **dedicated manufacturer** of Air Tube system over 5 decades
- awarded **twice** with “STATE-PRIZE“ of the Bavarian Government with the “**GOLD-MEDAL**“ for its innovative products
- awarded “**Top 100**“ one of the best 100 innovative middle-class enterprises in Germany
- **long tradition of innovative** developments by the company:
 - “Jumbo“ for up to 10 kg up @ 10 m/s
 - “Cargo“ for up to 25 kg @ 6 m/s
 - “CargoPlus“ for up to 50 kg @ 2 m/s
 - member of research project “CargoCap“ in the University of Bochum
- **DIN EN ISO 9001:2000** certified by VdS-Institute Germany
- a registered trademark known for its **quality and innovation**

Superior Features of Hörtig Air Tube

■ Simplicity:

- user-friendly, easy-to-use
- up to 20 coloured carriers for dedicated transports
- RFID for automatic dispatching to Lab and Pharmacy
- optimum travel route and time, high efficiency

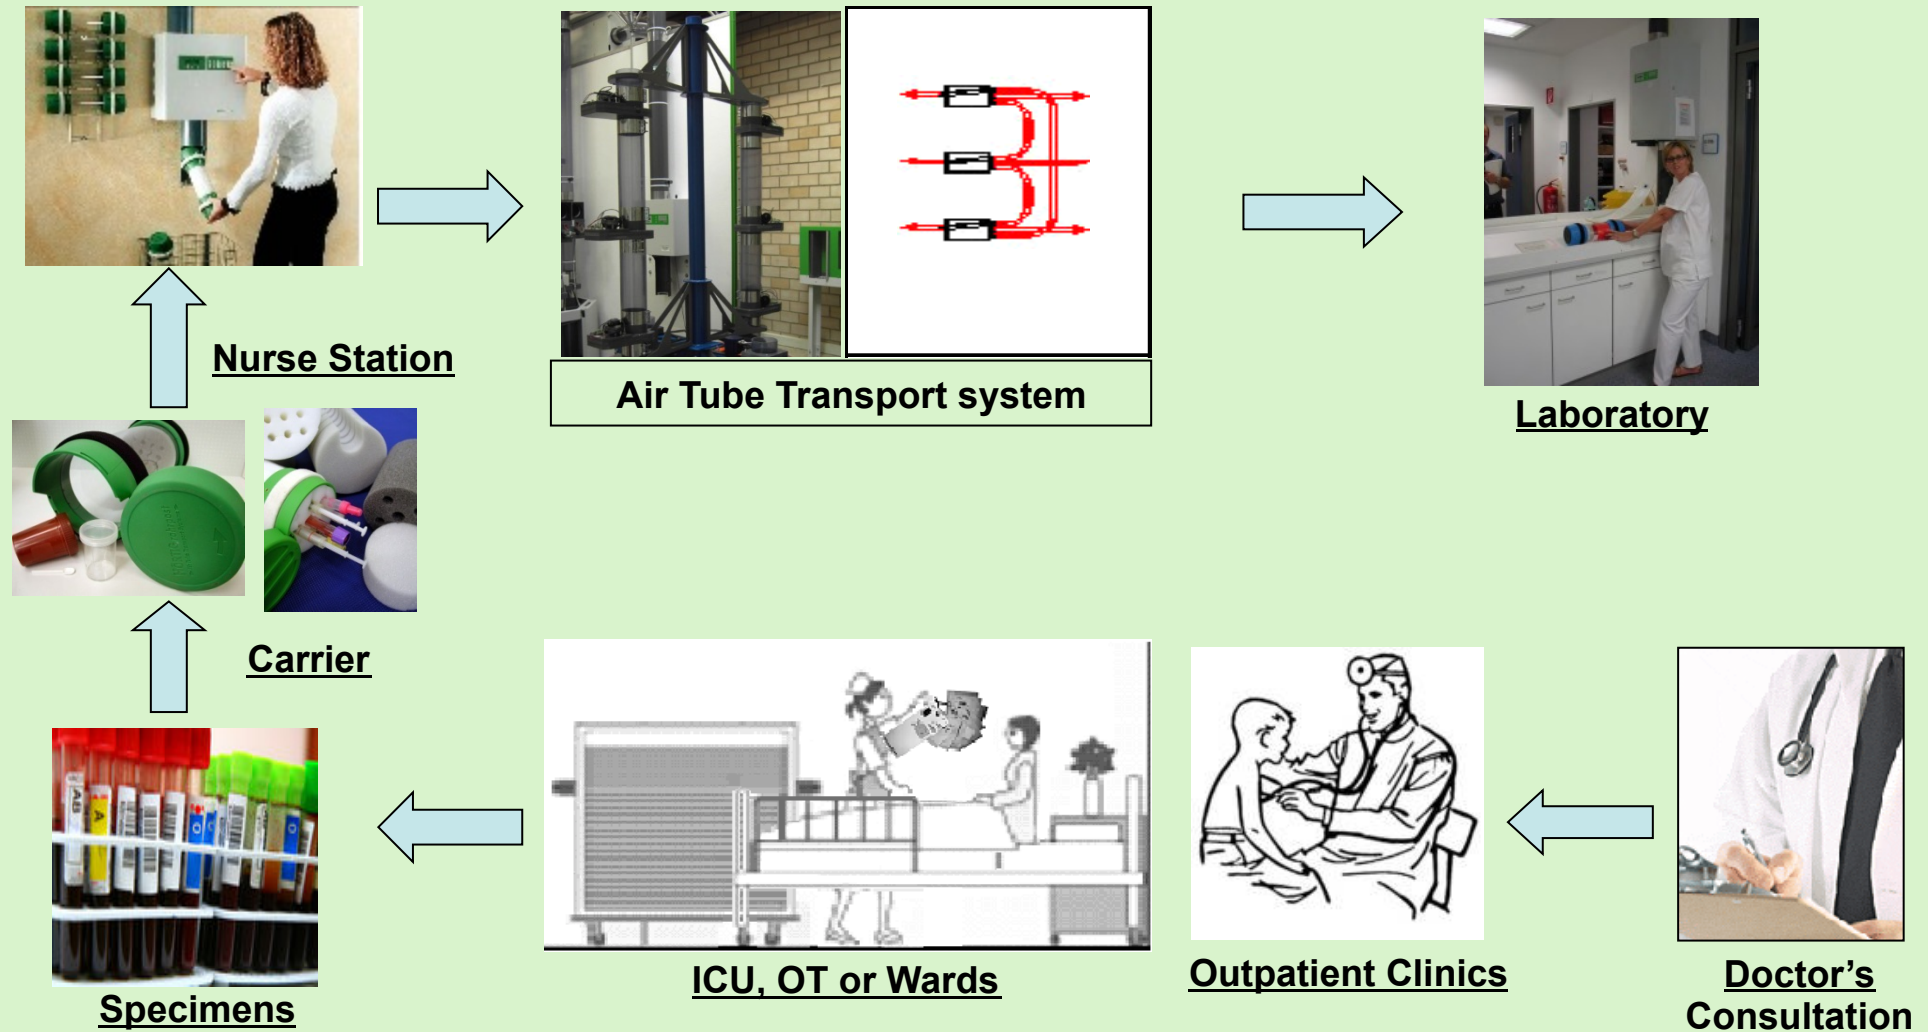

Station control panel

- Wider screen display
- Up to 8 lines x 26 characters, multi-language
- Membrane keypad with cursor control
- 3 LED lamps for station status (busy, error, carrier arriving)
- day/night light sensor; display changes automatically on day or night
- 3 function-keys; Quick-Dial
- E.S.D. (electro-static discharge) protected

ColourSend with Materials Classification

Generally, there are 3 classification of transported materials in hospital. Using coloured carriers for different transport items ensure a high standard of hygiene. HÖRTIG Rohrpost offers unique materials management solution:

Transport Items	 <ul style="list-style-type: none"> ➤ Blood Specimen ➤ Urine Samples ➤ Swabs ➤ Blood Cultures ➤ Stools ➤ Body Fluids 	 <ul style="list-style-type: none"> ➤ Prescription Drugs ➤ Medicine 	 <ul style="list-style-type: none"> ➤ Documents (A4) ➤ Test Results ➤ X-Ray Films
Classification	Contaminated	Sterile	Non-contaminated
Coloured Carrier	 	 	 

ColourSend for Lab and Pharmacy

- Coloured carriers for dedicated transport management in hospital:
- **RED** carriers - automatic dispatching to Lab from all stations
- **GREEN** carriers - automatic returning to Pharmacy from all stations
- **BLUE** carriers - automatic returning to assigned stations

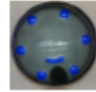

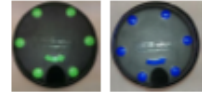

Benefits:

- easy-to-use, less steps, saves time, traceability
- either Automatic with RFID (no need to key code) or Quick-Dial
- hygiene, infectious control, prevention of cross-contamination
- With RFID - No lost carriers containing patient specimens.
- Simple, Efficient, Secure, Safe, Hygienic!

ColourSend+RFID = error-free operation assured!

At Ward or Clinics:

- auto dispatching:
 - **RED** carriers to Lab
 - Return **GREEN** carriers to Pharmacy
 - Return **BLUE** carriers to other stations
- dial station code or Quick-dial:
 - own **BLUE** carrier to other station

At Lab:

- auto-dispatching:
 - Return **RED** carriers to other stations
- -dial station code or Quick-dial:
 - own **RED** carrier to other station

At Pharmacy:

- dial station code or Quick-dial:
 - own **GREEN** carrier to other station

ColourSend with RFID

Carrier with RFID for automatic dispatching or return back

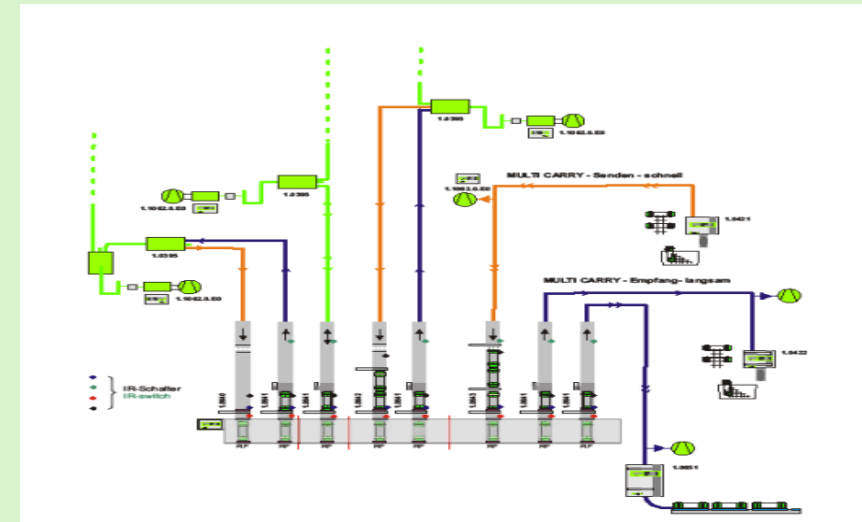

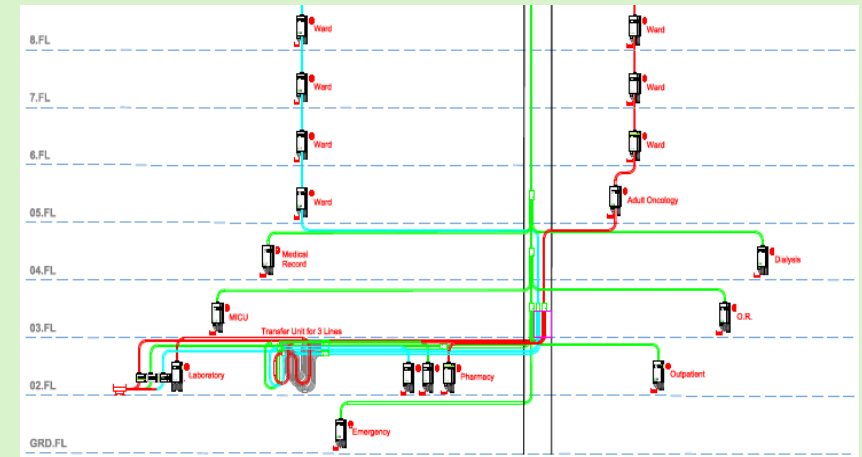

- By implanting an ID chip, carriers can be identified through a RFID reader and dispatch to assigned departments automatically e.g. Lab or return back to their original home stations automatically; not necessary to push any button.
- Supported by RFID technology every station can work with his own carriers. In this way the carriers don't need to be held in a large number.
- Empty carrier management allows automatic refill of carriers to depleted stations.

Optimum Travel Route Planning

- Direct dispatch to Lab
 - from each zone
 - by Multi-carry via Transfer Unit up to 360 carriers per hour
- Direct dispatch from Pharmacy
 - from each zone
 - by Multi-carry via Transfer Unit up to 360 carriers per hour

Benefits:

- most efficient route planning
- high volume transports
- minimum travel time for critical transports
- minimise traffic congestion
- optimum efficiency

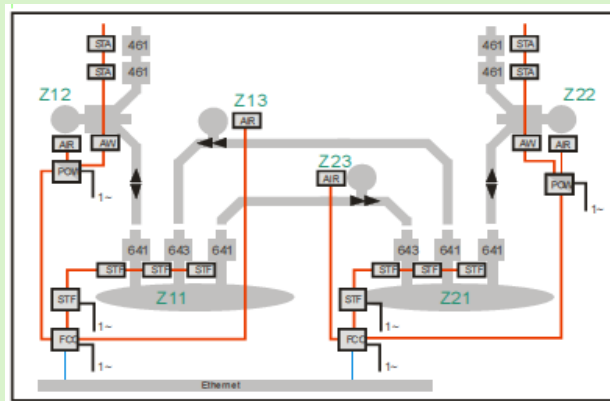

Superior Features of Hörtig Air Tube

■ Reliability:

- industrial field bus:
CAN-bus via Ethernet LAN - stable, robust, and reliable
- IP-based networking
- 3-D display, teamviewer for remote support
- PC software displays mean-time-between failure (MTBF)
- no overloading, no obstacle, RFID reader, secure

 - sort into Priority, Normal & Return lanes

3-send Station

Horizontal Receive Station

Station with receiving bow

Protection against overloading & obstacle

- Our **bottom loading stations** provide the **best protection** against overloading thanks to their rational and optimum construction.
- Due to **gravity** the overloaded carriers cannot be taken into the stations because the loading port is at the bottom of the station. The **overloaded carrier will stay there**.
- Similar to overloading only our carrier can be accepted by bottom loading station. **Absolutely no obstacle can get access in to our system**

Real time information resulting in timely patient care!

Unique Efficient Transport Solutions

■ One-way Transport

- unique Bag system from Central or designated Blood Collection room/s, Emergency, OT directly to Laboratory.
- no carriers to manage, hygienic, authentication, safe.
- one-way; high transport volume.
- reduces congestion in main Air Tube system.

■ Shuttle Transport with ColourSend+RFID

- shuttle transport between patient stations and Lab.

■ Convoy Transport with *Priority-Normal-Return* receiving conveyors at Lab

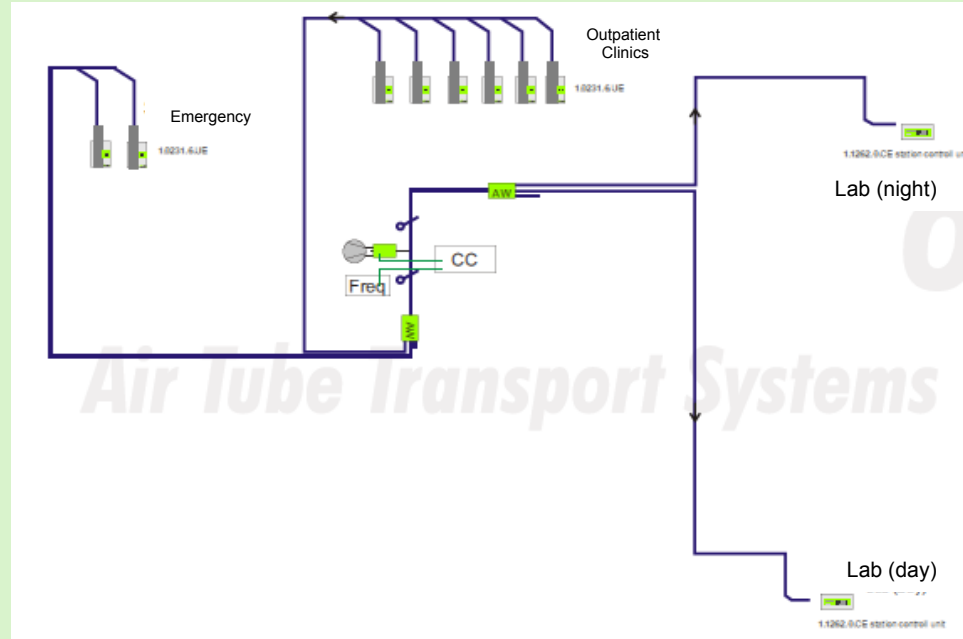

- with Multicarry Express - carriers dispatch every 10 seconds.
- up to 360 carrier per hour on single travel transport.

■ Multi-zone Transport

- multi-zone system for hospital-wide connecting all outpatient clinics, wards to Lab, Pharmacy, Medical Records, etc.

Multi transport solutions with One H61F control system!

One-Way Transport Solution - Bag System

- One-way Transport
 - unique Bag system from Central or designated Blood Collection room/s, ER, OT, ICU directly to Lab (Day or Night) or different Labs
 - low cost investment

Shuttle Transport Solution - ColourSend+RFID

to / fro Lab

to Pharmacy

to Sender Station

- Coloured carriers for dedicated transport management in hospital:
- **RED** carriers - automatic dispatching to Lab from all stations
- **GREEN** carriers - automatic returning to Pharmacy from all stations
- **BLUE** carriers - automatic returning to assigned station
- programmable to manage up to 20 coloured carriers

Convoy Transport Solution - Inter-zone Transfer

MultiCarry - either with diverter transfer (or revolver transfer)

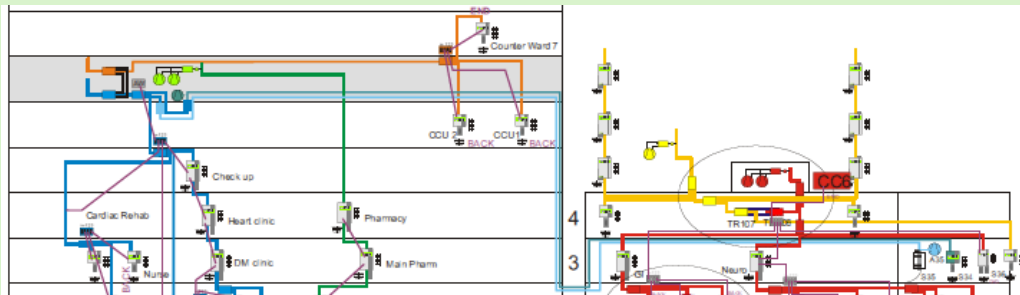

- Each zone with **individual** blower connection
- Each transfer zone can hold **1 carrier each** from each zone; max 2 carriers per transfer
- **Separate transfer zone** (additional) is required for 3 zones or more
- **Use Multi-carry (up to 360 carriers per hour)** for high volume transport

2 zones diverter transfer

3 zones diverter transfer

Multi-zone - Revolver Transfer (2 to 16 zones)

- **High efficiency**; reduce waiting time at stations
- **High throughput**; up to 360 carriers per hour
- **Buffering**; up to 16 carriers storage on revolver
- **Priority management**; dispatch carriers with highest priority
- **Interim storage**; basket full at station, under service.
- **Multi-designs**:
 - transfer hub between zones,
 - multi-transfer hubs,
 - carrier storage on transfer revolver,
 - carrier storage on in-coming line,
 - **multi-carry express** transports to lab (upto 360 carriers per hour),
 - **multi-carry express** for returning empty carrier from lab (upto 360 carriers per hour),
 - State-of-the-Art **revolver transfer technology**

Compact design

Your Hospital's ICON: Air Tube Gallery

AIR TUBE GALLERY DESIGN

- **Techno-ICON**
 - display in Hospital lobby
 - hospital investment in technology
- **Air Tube Gallery consist:**
 - diverters painted in red, green and blue (different zones)
 - Plexiglas clear tubes installed below ceiling
 - coloured carriers (RED, GREEN, BLUE) travel pass this gallery
 - enhancement to interior deco
 - entertaining

A delight to visitors!

Hörtig Dual-blowers

- dual-blowers
- dual speeds: 3 m/s and 6 m/s

Benefits:

- energy savings up to 50% with 1 blower running for all transports to Lab
- if one blower fails, the other blower can resume system operation

Summary of HÖRTIG Air Tube Solutions

- ERROR-FREE OPERATION
 - ColourSend+RFID, hygienic, infectious control management
 - easy-to-use, tracking, traceability, secure, safe
- RELIABILITY
 - high quality and long-life components with MTBF statistics
 - industrial-grade system
 - trouble-free system operation and energy saving
- EFFICIENT MULTI-TRANSPORTS in One Air Tube system
 - one-way, shuttle, convoy, inter-zone and multi-zone transportation
- FUTURE TECHNOLOGY IN TODAY
 - IP-based, network to LIS, PIS, sms, etc.
 - barcoding or RFID tag integration
 - monitoring screens at Lab and Pharmacy; real-time information
 - transfer revolver with buffers, priority management

Guaranteed high performance and reliable quality

Thanks for your attention!

We offer wide range of systems and stations. Beside our standard systems we also develop customer specified systems with the most different requirements to the goods, the weights and the stations.

HÖRTIG *rohrpost*
**a leading manufacturer of Air Tube Transport
Systems**
will always be a good choice!
